

Why is it Important to Visit Your Doctor Instead of the Emergency Room?

Unless it is a true emergency, patients typically receive care that will have a greater impact on their health by seeing their own doctor. In a private practice doctors can take a closer look and manage your health. Your cost of care in the emergency room is much higher than at your doctor's office.

"EMERGENCY" is what the emergency room treats best, usually a life threatening situation that could cause serious harm to your health if not addressed immediately.

"NON-EMERGENCY" are conditions that are likely to lead to worsening health outcomes if you are not seen within 24 hours.

These Board Certified Physicians work with your primary care doctor. They provide on-site x-ray and diagnostic procedures which allow patients to be treated immediately for most minor medical emergencies. No appointment is necessary. **DocNow Urgent Care** offers lower costs than a hospital emergency room.
